ADDENDUM I

SUBJECT: Request for Qualifications #00179, Stormwater Impacts Through Low Impact Development (LID)/Green Infrastructure (GI) Scheduled to Open: February 25, 2020 at 11:00 AM C.S.T.

FROM: Emily Hanson, Purchasing Coordinator, ehanson@sara-tx.org

DATE: February 12, 2020

This notice shall serve as Addendum No. I - to the above referenced SOLICITATION

THE ABOVE MENTIONED SOLICITATION IS HEREBY AMENDED AS FOLLOWS:

UPDATED: Questions and Answers submitted via email.
Below is a list of questions that were submitted via email before the question submittal deadline. The River Authority’s official response to questions asked is as follows:

1. In our opinion, there is professional overlap between registered (professional) landscape architects and professional planners. In the RFQ on page 6, the minimum qualifications state both are required. For the factors outlined in this RFQ, a landscape architect is a must. But, is having a professional planner mandatory for the response? We feel a professional planner should not be necessary but preferred.

A professional planner is not required, but the responding team should be qualified to perform “planning-type” work dealing with contemporary planning theory and application, public meetings, comprehensive and regional center plan coordination, Climate Action and Adaptation Plan coordination, master planning, land use and zoning, and the unified development code. A registered professional landscape architect is required for this project.

2. Under Submission Format Section E, “Sample diagrams and/or documents layouts developed by the respondent”, what type of documents were you looking for?

We are looking for examples from your portfolio of effective communication tools—other than text-based—used to relay complex ideas, concepts, modeling outputs, site plans, GSI features, etc. in the form of diagrams, illustrative renderings, document organization, or other.

Please acknowledge addendum on Attachment F of the solicitation document when submitting a response.
